

Iteration1 - Feedback for code

Team name: **Bad Team**

Instructor's feedback:

Well done!

TA demo notes:

| | | |
|--|--|--|
| Working features (showed during the demo) | Frontend and Backend-Integrated: | Can register users. Can create typing challenges. Can join a created typing challenge. |
| | Frontend only: | Ui looks good. Html and CSS is well done. |
| | Backend only: | Users set up. Typing challenges are stored as models. |
| Untested and/or non-working code | Frontend only: | |
| | Backend only: | |
| Comments: | Typing test project with features like kahoot. Can login in and register. Can only take a test if not logged in. Nicknames used for tests. Typing task seems to work well. Gets data from user and makes some updates based off of it. Can create a new challenge for user to do. Can post and start challenges. Starting a challenge gives a room code for anyone to join. Colin - Did the UI front end (HTML and CSS) UI looks really good currently. Tyler did some of the routing. Joining the room and a session and set up the database and all the models. Brandon : login and register creating join code. Anna did the design doc | |

Score: **105**
